ADITYA KUMAR

Bengaluru, Karnataka • +91 74848 10050 • adityachy0077@gmail.com • LinkedIn • GitHub • Portfolio

PROFESSIONAL SUMMARY

Backend-focused software developer (B.Tech CSE, 2025) targeting Python, Django, and Full-Stack Developer roles. Hands-on experience building production-grade REST APIs and Django applications with Docker, MySQL, and CI/CD. Delivered CRM automation at Salesforce. Strong in API design, systems thinking, and writing clean, testable Python code.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), SQL
Backend: Django, Flask, Node.js, Nest.js, REST APIs, JWT Auth, SMTP Integration
Databases: MySQL, PostgreSQL, Oracle SQL - CRUD, Joins, Subqueries, Normalization, Schema Design
Frontend: React, HTML5, CSS3, Streamlit
Data & ML: pandas, NumPy, ARIMA, time-series forecasting
Testing: pytest, Postman, unit testing
DevOps & Tools: Docker, Git & GitHub, CI/CD, VS Code, SAP, Linux
Concepts: OOP, Agile/Scrum, System Design (fundamentals), Data Structures & Algorithms

PROJECTS

Food Ordering Web Application | *Python • Django • MySQL • Docker • SMTP | 2025* *github.com/adityakr09/foodzone-django*

- Built a full-stack food ordering platform with secure session-based authentication, supporting end-to-end order flows - cart, checkout, and confirmation - for ~50 concurrent test users.
- Exposed 10+ RESTful API endpoints for order management and user sessions, tested and documented via Postman.
- Designed a normalized MySQL schema (5 tables) reducing query fetch time by ~30% through indexed lookups and optimized joins.
- Implemented dynamic pricing engine and real-time order status updates using Django signals.
- Integrated SMTP-based transactional email system for automated order confirmations, achieving 100% delivery rate in testing.
- Containerized entire stack with Docker, enabling one-command local setup and consistent deployment across environments.

NSE Stock Trend Analytics Dashboard | *Python • ARIMA • Streamlit | 2024* *github.com/adityakr09/stock-analysis-dashboard*

- Built an ARIMA-based time series forecasting model on 3+ years of NSE historical data, predicting next-day closing prices with ~85% directional accuracy across 10 stocks.
- Scraped and preprocessed 10,000+ rows of market data using pandas and NumPy; handled stationarity, null values, and outlier treatment via ADF tests and interpolation.
- Developed an interactive Streamlit dashboard with filters for stock symbol, date range, and forecast horizon - reducing time-to-insight from raw data to visual trend in under 3 seconds.
- Containerized the app with Docker; deployed on Streamlit Cloud for public access.

PROFESSIONAL EXPERIENCE

Software Developer Intern – Salesforce | *Nov 2023 – Feb 2024 | Remote*

- Built 4 Lightning Web Components and REST APIs in JavaScript, automating CRM data-sync workflows and reducing manual data entry for ~2,000 records by an estimated 35%.
- Wrote Apex Triggers and SOQL queries to enforce data validation rules, catching and resolving 3 critical data inconsistency bugs in production workflows.
- Designed a scalable object model with validation rules that eliminated ~20% of duplicate records in the client's CRM database.
- Participated in bi-weekly Agile sprint reviews; authored reusable component library documentation adopted by 2 other team members.

EDUCATION

B.Tech Computer Science and Engineering | *Nov 2021 – May 2025*

B.P. Mandal Government College of Engineering • CGPA: 7.50

Relevant Coursework: *DBMS, Operating Systems, Computer Networks, Data Structures & Algorithms, OOP*

CERTIFICATIONS

• **Data Analytics** — Deloitte (2024) • **Machine Learning Fundamentals** — Cisco (2024) • **SQL and PostgreSQL** — Infosys (2025)
